Unisex fitting

When choosing the correct size always take the size where your mobility is not limited. The ability to move is important when windsurfing.

Therefore take the larger size with more width instead of the smaller one which tends to be too tight.

So always choose the size which is convenient and comfortable. In doubt please measure!

- For the correct fit a convenient and comfortable feeling is always in the foreground
- When in doubt, always choose a size larger, important are the start datas of the ION size chart table
- If you are in the rear third of the data with your body data according to size table, always choose the next larger size
