AVAILABLE SIZES

- XL - 54

When choosing the correct size always take the size where your mobility is not limited. The ability to move is important when windsurfing.

Therefore take the larger size with more width instead of the smaller one which tends to be too tight.

So always choose the size which is convenient and comfortable. In doubt please measure!

- For the correct fit a convenient and comfortable feeling is always in the foreground
- When in doubt, always choose a size larger, important are the start datas of the ION size chart table
- ION is body contoured and therewith cut close in comparison
- If you are in the rear third of the data with your body data according to size table, always choose the next larger size

An example for the correct size selection

Your datas are: Height 180cm, Weight 78kg, Chest 99cm
According to the ION size table you would fit in size 50 and size 52. At size 50 you are already in the rear area, so already at the size border. We would advise you to the size 52. The size 50 would be definitely too tight, especially ION is body contoured. The size 52 will fit you in any case and has a comfortable feel. Your size is 52 / L.

Do you still have any doubt about the size choice you or are you unsure, just contact us & Contact&It;. We'll be happy to help!
